

Sustainability Policy

EFT Consult will advise all employees and direct contractors of our policy, and its intent. Implementation of our policy is firstly the responsibility of our senior managers, but also the responsibility of all employees.

We will manage our business, including its supply chain interactions, responsibly. This will include the control of significant business risks and impacts, and increasing operational efficiency.

Environment and Resources

Our company:

- Is committed to identifying, managing and minimising any significant environmental impacts that result from our activities.
- Will implement risk control measures as necessary, to prevent the pollution of air, ground, or water resulting from our activities.
- Aims to reduce our energy use both at our own premises and, where possible, when working on-site.
- Will aim to ensure the safe and efficient recovery or disposal of wastes, and notably hazardous waste.
- Continually looks for cost-effective ways to minimize waste through the reuse and/or recovery of materials used in our operations.
- Advises all company drivers about the need for fuel-efficient driving, and records annual company mileage and fuel consumption.

Customers and Supply Chain

Our company:

- Makes relevant enquiries from our suppliers about their health, safety and environmental arrangements, and the environmental impacts of their products.
- Does business, where possible, with those who also share our sustainability policy commitments.
- Will advise our clients where possible about practical options for using energy efficient equipment and fittings.

Employment

Our company:

- Considers that the health, safety and welfare of our employees is a key component of running an efficient and sustainable business
- Provides necessary training for employees. This includes training on health and safety, and on waste minimisation and recovery.
- Consults with our employees on all significant company health, safety and environmental initiatives.

This policy is reviewed annually.
